Preface

The report that follows is a compilation and analysis of selected data reported by North Carolina public libraries for July 1, 1996 through June 30, 1997. The Federal-State Cooperative System (FSCS) report submitted to the National Center for Educational Statistics is generated from this data.

Within the tables, libraries are grouped by type (county, regional or municipal). Within each type, libraries are listed in descending order by legal size service population. This is done to facilitate comparisons with other libraries serving a similar size legal service population. Legal service population figures are from the 1996 North Carolina projections from the State Data Center.

Data element fields that were left blank or were reported as N/A are entered as zero. Also note that the statistics represent the 1996-97 fiscal year while the directory lists the latest available information. The directory also lists new area codes that become effective in 1998.

The Library Development Section always welcomes comments and suggestions. If you have suggestions about particular data elements, the tables, or this directory please contact any consultant in the Library Development Section.

The statistics are available on diskette in Microsoft Excel for Windows version 7.0 and can also be found on the State Library Home Page <statelibrary.dcr.state.nc.us/ld/plstats9697/plstats9697.htm>. Additional copies of this publication as well as customized reports, presentation quality graphics, or other special tables are available on request.
